

## **Cassidy Megan received some special photos**

7 April 2018

Cassidy Megan, founder of Purple Day, received some special photos recently. I am including a couple of them and you can view the others on the EpilepsyNS twitter page. Carrie, a purple day ambassador from the United States sent photos to Cassidy as her father Ricky had the opportunity to participate and promote epilepsy awareness from the International Space Station. He is part of NASA's Expedition 55/56 crew, and was donning his purple shirt on March 26th! Most of the members of Mission Control at NASA also sported Purple that day.

And, who said Purple Day was just limited to people on earth ? It seems like epilepsy & Purple Day has reached a whole Universe ...so to speak !

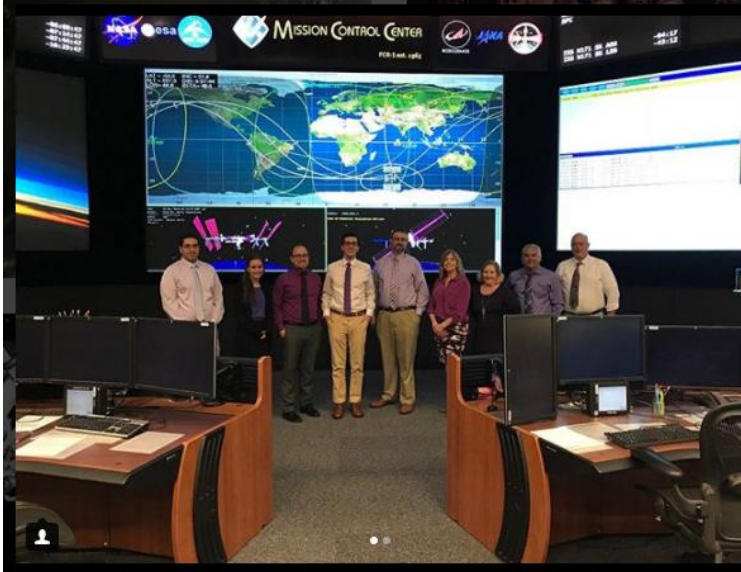

Chers collègues,

Cassidy Megan, fondatrice de la journée Lavande , a reçu des photos récemment. Je suis notamment un couple d'entre eux et vous pouvez voir les autres sur le EpilepsyNS page twitter. Carrie, la journée lavande un ambassadeur des États-Unis a envoyé des photos à Cassidy comme son père Ricky a eu l'occasion de participer et de promouvoir la sensibilisation à l'épilepsie à partir de la Station spatiale internationale. Il fait partie de l'expédition de la NASA, l'équipage a été et 55/56 d'enfiler sa chemise violette le 26 Mars ! La plupart des membres de la Mission de contrôle à la NASA a également porté ce jour pourpre.

Et, qui a déclaré la Journée lavande était seulement limité aux personnes sur terre ? Il semble que l'épilepsie et la journée lavande a atteint un ensemble de l'Univers ...pour ainsi dire !

Enjoy your weekend !
