

GUIDANCE – PRIVACY – SHELTER

IN AN INSTANT

www.firstaidpod.com
sales@firstaidpod.com

Have you ever found yourself in a situation in your business where someone required immediate medical attention?
Did you know what to do?

Without appropriate first aid training, it can be difficult to know where to start.

The First Aid Pod is here to guide you with easy to follow, basic life support procedures known as DRSABCD which is clearly printed on the inside of the First Aid Pod, as well as on the carry bag. This gives guidance to those assisting and is easy to follow with or without any first aid knowledge.

It is floor less, so is easily placed over or around the patient to provide privacy from onlookers and shelter from the surrounding elements as it is water and UV resistant.

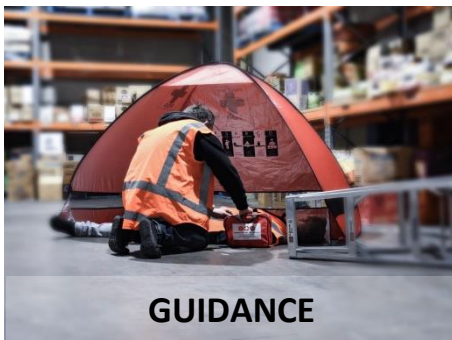

The design of the First Aid Pod, as well as the bright colour, ensures you will be easily identifiable by other first aiders and emergency services.

The First Aid Pod is perfect for your business to provide privacy for your team or customers, medical guidance to your first aid responders and visibility to emergency services in a busy environment.

Assembly is quick and easy with its instant pop up design and the First Aid Pod is completely re-useable.

Inside your First Aid Pod, you will find a 57 piece Emergency First Aid Kit and ground pegs to secure your first aid pod in an outdoor setting.

EMERGENCIES AND MEDICAL EVENTS STRIKE WHEN LEAST EXPECTED. IT PAYS TO BE PREPARED.
